

700MB Recordable CD-R Media

Recordable compact discs (CD-Rs) are optical storage media that can be written to once and read many times. These blank CD-Rs offer a storage capacity of 700MB or 80 minutes of audio, suitable for data archiving, music recording, and software distribution.

Overview

Professional Grade CD-R Media

These recordable compact discs (CD-Rs) provide a reliable solution for data archiving, music recording, and software distribution. Designed for single-write applications, each disc offers a standard 700MB storage capacity or 80 minutes of audio playback. With a reflective layer and protective coating, these discs ensure long-term data integrity and are compatible with standard CD writers and players.
