Product Overview

Compact Personal Heating Solution

This 700W Ceramic PTC fan heater is engineered for efficient personal space heating in offices, student dorms, or small rooms. Utilizing advanced Positive Temperature Coefficient (PTC) technology, it provides self-regulating, consistent heat output with a long-lasting heating element. The unit combines a compact, durable design with essential safety features, including a built-in tip-over switch to ensure secure operation.

Technical Specifications

Rated Power

700 W

Rated Power

Dimensions

156 x 154 x 193 mm

Heating Element

Ceramic PTC

Features & Safety

Usage Highlights

- Easy to operate interface
- Stable base with non-slip feet
- Compact and portable design
- Constant temperature control

Safety Features

Tip-over switch, Heat-resistant casing, Safety grill
