Overview

High-Performance 700W LED Dimmer

This 700W LED Rotary Dimmer Switch combines a slim, aesthetic profile with advanced electronic reliability. Featuring a smooth rotary dial and a concealed-screw design, it offers precise brightness control while maintaining a clean, modern look suitable for high-end commercial and residential interiors. The integrated metal frame ensures impact resistance and durability in demanding environments.

Power Ratings

700 W

Maximum Load

250 W

Optional Load

500 W

Optional Load

Internal Components

- World-renowned brand SCR for high reliability
- Integrated fuse protection
- Computer-optimized circuit design
- High-frequency harmonic interference absorption

Design & Construction

Profile Design	Slim profile with concealed-screws
Frame Construction	Earthed metal frame for impact resistance
Thermal Management	Circled holes for heat radiation
Available Finishes	White Injection, Varnish Finish, Custom Painting

Application

Recommended Applications

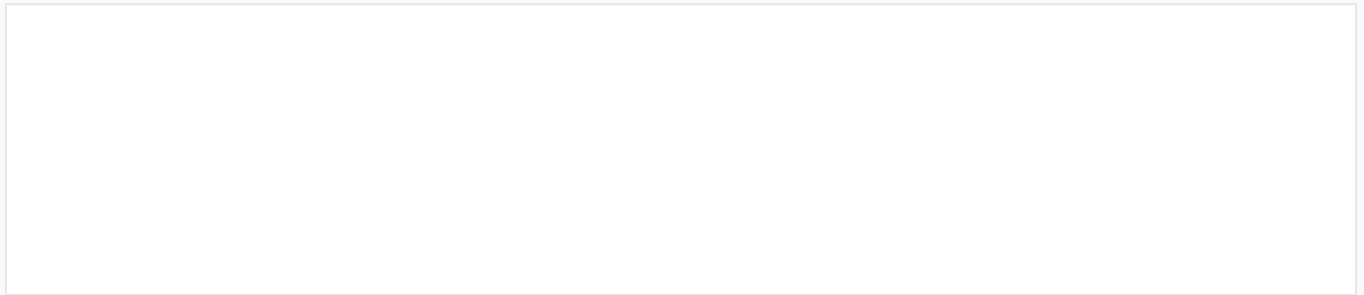

Conference Halls • Galleries • Supermarkets • Studios • Residential • Bars

Quality Assurance

Quality Control

- Routine aging tests performed
- CNAS certified laboratory testing
- In-process quality inspections

Installation

Standard wiring scheme for secure installation, including Line In and Load Out terminals.

Wiring Terminals

- Line In (L)
- Neutral (N)
- Load Out
