

700W Stainless Steel Juicer Blender Food Processor

This versatile appliance functions as a juicer, blender, and vegetable chopper. It features a powerful 700W motor and a durable stainless steel construction.

Product Overview

Versatile 9-in-1 Food Processing Solution

This 700W stainless steel power juicer is a comprehensive kitchen workstation designed for high-efficiency juice extraction and food preparation. It features an extra-wide 75mm feeding chute that accommodates whole fruits, significantly reducing prep time for professional and home use. With its multi-functional attachments, it seamlessly transitions between juicing, blending, chopping, and grinding to meet diverse culinary requirements.
