

70kW Flanged Immersion Heater

This is a 70kW flanged immersion heater. It is designed for heating steam, tubular tanks, and oil.

Product Overview

High-Performance Industrial Heating

This 70kW flanged immersion heater is engineered for demanding industrial environments, providing rapid and consistent heat transfer. Designed for versatility, it is suitable for heating steam, tubular tanks, and various oil-based fluids. The robust flange mounting ensures a secure and reliable installation, making it an ideal solution for large-scale liquid heating applications.

Technical Specifications

Power Rating

70 kW

Power Output

Design Features

- Multiple tubular heating elements
- Robust flange for secure mounting
- High-power output for rapid heating

Suitable Applications

Steam Heating, Tubular Tanks, Oil Heating, Industrial Liquids

Mounting Style

Flanged
