

70mm AC Gear Motor with Micro Induction

This AC gear motor is designed for reversible operation and long life. It is suitable for precision control and consistent operation in various industrial and automation settings.

Overview

Compact Micro Induction Gear Motor

This 70mm AC gear motor is engineered for micro induction applications, offering a robust and reliable solution for industrial automation and precision control. Its compact design ensures seamless integration into various electric tools and accessories while delivering consistent power transmission. Designed for reversible operation, this motor provides the optimal torque and speed necessary for demanding professional environments.

Technical Specifications

Power Rating	15 W
Voltage	220 V
Frequency	50 Hz
Rated Current	0.17 A
Rated Speed	1250 rpm
Motor Frame Size	70 mm
