

70W Solar Street Light with S-Type Pole

This off-grid lighting solution harnesses solar energy for illumination. The system features a solar panel, battery, and LED lamp for bright and efficient lighting.

Product Overview

Solar Lighting Solution

The S-type 70W Solar Street Light is a high-efficiency, off-grid illumination system designed for public and residential spaces. Utilizing an integrated solar panel and high-capacity battery, it converts sunlight into reliable nighttime lighting. Its unique S-shaped pole design provides both structural stability and a modern aesthetic suitable for parks and community areas.

Technical Specifications

Rated Power

70 W

Power Output

Key Features

Off-Grid, Solar Powered, Low Maintenance, Easy Installation, Environmentally Friendly

Application

Recommended Use Cases

- Public Parks
- Residential Areas
- Public Spaces
