Product Overview

Compact High-Performance Water Heating

This electric tank water heater is designed for efficient point-of-use applications, featuring a robust blue diamond enamel inner tank for superior corrosion resistance. Available in 7L and 10L capacities, it offers flexible floor-standing installation and rapid heating capabilities up to 75°C. With a focus on safety and durability, the unit includes high-pressure resistance and optional leakage protection, making it an ideal choice for professional B2B sourcing.

Technical Performance

Performance Highlights

2000 W
Max Power

0.8 MPa
Rated Pressure

75 °C
Max Temperature

Model Variations

Model Name	Capacity	Rated Power
DW15-J07/U	7L	1500W / 2000W
DW15-J10/U	10L	1500W / 2000W

Construction & Durability

Advanced single weld line design using thickened SPCC material significantly reduces leakage risk and sustains high pressure.

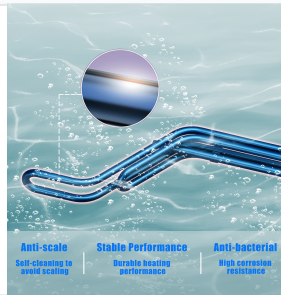

Tank Engineering

- Exclusive single weld line design
- Customized thickened SPCC material
- 67% reduction in leakage risk
- High-pressure resistant construction

Inner Tank Material

Blue diamond enamel

Heating & Efficiency

The durable heating element features anti-scale and anti-bacterial properties for stable, long-lasting performance.

Heating Element Benefits

Anti-scale, Self-cleaning, Anti-bacterial, Corrosion Resistant, Fast Heating

Installation & Operation

Installation Type

Floor standing type

Control Mode

Mechanical control with adjustable temperature

Safety & Protection

Waterproof Rating

IPX4

Leakage Protection

Optional (e.g., ELCB)

Warranty

Warranty Coverage

- 5 years warranty on tank
- 1 year warranty for other parts
