

720P High-Definition Embedded Network Video Recorder

This high-definition 720P embedded network video recorder (NVR) is designed for surveillance applications. It features real-time recording, remote access, and advanced video analytics.

Overview

High-Definition Surveillance Solution

The 720P High-Definition Embedded Network Video Recorder is a robust solution designed for professional surveillance applications. It supports real-time recording, remote access, and advanced video analytics to ensure continuous, reliable monitoring. This unit is ideal for security systems that demand high-quality video capture and efficient storage management.

Technical Specifications

Resolution	720P
Device Type	Embedded Network Video Recorder (NVR)
Key Capabilities	Real-time recording, Remote access, Video analytics

Lens Specifications

Lens Configuration

3.6 mm Focal Length	1.4 F Aperture
-------------------------------	--------------------------

Lens Features

- Auto Iris
- CCTV Optimized
