

7.2V Replacement Battery for Power Tools

This is a 7.2V replacement battery pack for cordless power tools. It provides reliable power and extended life.

Product Overview

Reliable 7.2V Replacement Battery

This high-quality replacement battery is engineered for 7.2V cordless power tools, offering a dependable power source for various professional and DIY applications. Designed with robust construction to withstand regular use, it ensures consistent power output and an extended operational lifespan. It is an ideal solution for restoring performance to your existing power tool equipment.

Technical Specifications

Voltage	7.2 V
Battery Chemistry	Ni-CD, Ni-MH
Weight	400 g

Product Information

Primary Applications
Power Tools • Energy Storage

Model Number	BCC715
Place of Origin	Guangdong, China
