

# 730mm Manual Tile Cutter

This manual tile cutter is designed for cutting tiles up to 730mm in length. It features a rigid aluminum base and a tungsten-carbide scoring wheel for smooth, accurate cuts.

## ADDITIONAL IMAGES

## Overview

### Professional Manual Tile Cutter

The 8102G-4 is a high-performance manual tile cutter engineered for precision scoring and breaking of ceramic, porcelain, and mosaic tiles. Featuring an aluminium die-casting base for maximum rigidity and stability, it ensures professional-grade accuracy on every cut. The human-engineered handle and ball-bearing sliding bar provide a smooth, ergonomic user experience even during high-volume projects.

Detailed dimensions and cutting capacities for the 8102G-4 manual tile cutter.

### Key Performance Metrics

<b>730 mm</b> Max Working Length	<b>14 mm</b> Max Tile Thickness
-------------------------------------	------------------------------------

## Cutting Mechanism

### Scoring Wheel Specifications

Component	Specification
Material	Coated Tungsten-Carbide
Wheel Diameter	22mm
Bore Diameter	6mm
Wheel Thickness	6mm
Blade Thickness	2mm

## Design & Construction

### Key Features

- Aluminium die-casting base for rigidity and precision
- Human-engineering handle for comfortable operation
- Sliding bar with durable ball bearings for smooth scoring
- Lockable breaking device for optimal cutting visibility
- Spring-loaded base for optimal tile support
- Integrated spare replacement blade storage

## Applications

Compatible Materials	Ceramic, Porcelain, Mosaics
----------------------	-----------------------------

## Logistics & Dimensions

Base Width	515 mm
Gross Weight	13 kg
Net Weight	12 kg
Package Dimensions	98 x 29 x 49 cm
