

7.4V 6300mAh Rechargeable Battery Pack

This is a high-capacity rechargeable battery pack designed for specialized electronic devices. It features a 7.4V output and a 6300mAh capacity, ensuring extended operational time.

Overview

High-Capacity Power Solution

This rechargeable battery pack is engineered for specialized electronic devices requiring consistent and reliable power. With a 7.4V output and a 6300mAh capacity, it is designed to provide extended operational time for demanding professional and industrial applications. Ensure compatibility by using only the specified charger for optimal performance and safety.

Technical Specifications

Performance Metrics

7.4 V Voltage	6300 mAh Capacity
-------------------------	-----------------------------

Rated Voltage	7.4 V
Capacity	6300 mAh

Safety & Usage

Charging Requirements	Use specified charger only
Compatibility	Professional Grade, Industrial Use
