Product Overview

Professional 75-Degree Offset Spanner

This 75-degree offset double ring spanner is engineered for accessing fasteners in confined spaces where clearance is limited. Constructed from durable 45# carbon steel with a chrome-plated finish, it provides excellent resistance to wear and longevity for mechanical and industrial applications. The offset design ensures optimal leverage and hand clearance, making it an essential tool for professional mechanics.

Technical Specifications

Material	45# Carbon Steel
Surface Finish	Chrome Plated
Key Features	75-Degree Offset, Double Ring, Corrosion Resistant
