Overview

High-Performance 75 HP 4WD Tractor

This 75 HP 4WD tractor is engineered for versatility, serving as an ideal solution for dry land, paddy fields, and various multifunctional agricultural applications. Built with advanced technology, it features a robust chassis, a high-torque engine meeting Euro II emission standards, and a synchronized gearbox for seamless operation. Designed for reliability and operator comfort, this machine provides the traction and lifting power necessary for demanding field conditions.

Performance Metrics

Engine & Power

75 HP

Horsepower

25 %

Torque Reserve

17 kN

Traction Force

Certifications & Standards

Euro II • OECD • EAC • E-mark

Transmission & Drivetrain

Drivetrain Features

- 4WD Capability
- Synchronized gearbox
- Strengthened front axle
- Enhanced waterproof performance

Gearbox Configuration

Synchronizer 12 Forward + 12 Reverse

Hydraulics & Implements

Lifting Performance

11.5 kN

Max Lifting Force

Hydraulic System

- Two-way hydraulic output
- Shared-oil lifting
- Dual auxiliary oil cylinders lifter
- Category II three-point hitch

PTO Specifications

6 splines, optional rotation speeds: 540/760/1000 RPM

Operator Environment

Cabin & Handling

- High handling comfort
- Ergonomic instrument cluster
- Internal/External air filter options
- Upper exhaust system
