

7.5 HP Gasoline Engine

This gasoline engine features a 223cc displacement and delivers 7.5 gross horsepower at 3600 rpm. It is suitable for various applications requiring reliable and efficient power.

Overview

High-Performance Gasoline Engine

The SC230 gasoline engine is a robust power solution engineered for reliable performance in power generation applications. Featuring a 223cc displacement and an Overhead Valve (OHV) design, this engine delivers consistent output and durability. It provides 7.5 gross horsepower at 3600 rpm, making it a versatile choice for various industrial and commercial equipment setups.

Performance Metrics

Power Output

7.5 HP Gross Horsepower	3600 rpm Rated Speed
-----------------------------------	--------------------------------

Engine Displacement	223 cc
---------------------	--------

Technical Details

Valve Configuration	OHV (Overhead Valve)
---------------------	----------------------

Maintenance

Air Filter Service Interval	Clean every 50 hours of operation
-----------------------------	-----------------------------------

Safety

Safety Compliance	Danger Warning, Peligro Warning
-------------------	---------------------------------
