

75 Ohm Coaxial Cable

This coaxial cable is suitable for video field, communication systems, and signal controlling systems. It is used in video monitor circuitry, broadcast signal control, and closed-circuit TV monitor systems.

Product Overview

Professional 75 Ohm Coaxial Cable

This 75 Ohm coaxial cable is engineered for reliable signal transmission in demanding audio and video applications. It features a robust construction with a high-quality copper internal conductor, solid polyethylene insulation, and multi-layer shielding to ensure minimal interference. Designed for longevity and performance, this cable supports a maximum operating conductor temperature of 70°C and is suitable for diverse electronic installations.

Technical Specifications

Characteristic Impedance

75 Ω
Impedance

Max Operating Temperature

70 °C

Construction

Material Composition

Copper Conductor, Polyethylene Insulation, Aluminum Mylar, Copper Braid Shielding, PVC Sheath

Logistics

Available Roll Lengths

- 200m/roll
- 300m/roll
- 500m/roll
