

750ml Wine Bottle Single Cavity Mould

This is a single cavity mould engineered for producing 750ml wine bottles. It is made from high-quality materials, ensuring durability, consistent performance, and precise bottle sizing.

Overview

Precision Wine Bottle Manufacturing

This 750ml single cavity mould is precision-engineered for the high-quality production of glass wine bottles. Constructed from premium materials, it ensures long-term durability and consistent performance in demanding manufacturing environments. The design focuses on efficient heat transfer and smooth bottle ejection to maximize production throughput and minimize defects.

Key Performance Metrics

Core Specifications

750 ml

Capacity

1 Qty

Cavity Count

Technical Features

Internal Finish

Smooth internal finish for flawless bottle formation

Dimensional Precision

Precise dimensions for accurate bottle sizing

Thermal Efficiency

Designed for efficient heat transfer

Manufacturing & Compatibility

Process Compatibility

Automated Manufacturing • Single Cavity Production

Operational Benefits

- High-quality material construction
- Consistent performance
- Easy bottle ejection
- Maximizes production efficiency
