Product Overview

Premium Butyl Performance

This high-quality butyl rubber inner tube is engineered specifically for light truck applications, offering superior airtightness and structural integrity. Designed with an advanced rubber compound, it provides exceptional resistance to aging, heat, oxidation, and ozone, ensuring reliable performance across varying temperatures. Its durable construction significantly reduces inflation frequency and helps extend the overall service life of your tires.

Technical Specifications

Compatible Tire Size	750R16
Material Type	Butyl Rubber

Key Features

Performance Advantages

3 vs Natural Rubber

Shelf Life Multiplier

Resistance Capabilities

Aging Resistant, Heat Resistant, Oxidation Resistant, Ozone Resistant

Application & Use

Ideal Applications

- Light Truck Tires
- Commercial Vehicles
- Heavy-Duty Applications
