

750W Electric Drywall Sander

This 750W drywall sander is designed for sanding drywall and plaster walls and ceilings. Its lightweight design ensures comfortable use, while the variable speed control and integrated dust extraction system enhance efficiency.

Overview

Professional 750W Drywall Sander

This powerful 750W electric drywall sander is engineered for efficient sanding of plaster walls and ceilings. Featuring an ergonomic, extendable design and integrated LED lighting, it ensures high visibility and comfort during extended use. The variable speed control and articulating head allow for precise finishes in both open areas and tight corners.

Performance
