Product Overview

High-Efficiency Silent Air Compressor

This 7.5kW (10HP) silent air compressor is engineered for industrial applications requiring a reliable, consistent, and quiet compressed air supply. Built with advanced technology, the unit features robust construction designed for continuous operation in noise-sensitive environments like workshops and factories. It includes essential components such as a high-performance motor, air receiver tank, and precision pressure regulators to ensure stable output for pneumatic tools and equipment.

Technical Specifications

Power Rating

7.5 kW

Power Output (kW)

10 HP

Horsepower

Key Features

- Silent operation design
- Advanced Germany technology
- High-performance motor
- Integrated pressure regulator and safety valves
- Suitable for continuous operation

Certifications & Compliance

Certifications

ISO 9001 • CE • ISO 14001:2004
