

7.5kW Gasoline Generator with AVR

This gasoline generator delivers 7.5kW of power and is suitable for a variety of applications. It is equipped with an AVR (Automatic Voltage Regulator) to ensure stable voltage output and protect sensitive electronic equipment.

Overview

Reliable Power Generation

This 7.5kW gasoline generator is engineered for durability and consistent performance. Featuring an integrated Automatic Voltage Regulator (AVR), it delivers stable power output with a Total Harmonic Distortion (THD) of less than 3%, making it safe for sensitive electronic equipment. The robust frame design includes protective piping and wheels for easy transport, while the advanced ventilation system ensures optimal operating temperatures during extended use.

Performance Metrics

Rated Power Output

7.5 kW

Power Output

THD (Total Harmonic Distortion)

< 3%

Technical Features

Maintenance Features

- Easy-maintenance air filter design
- Multi-indication digital meter
- Low-noise muffler design

Protection Systems

Overload Protection, Short-circuit Protection, Low Oil Protection, AVR (Automatic Voltage Regulator)

Physical Attributes

Frame Construction

Thick Pipe Frame • Portable Wheels
