Overview

Versatile Hybrid Cooking Solution

This 75-liter built-in oven offers a sophisticated hybrid cooking experience by combining the rapid heating capabilities of gas with the precise, consistent temperature control of electric elements. Designed for seamless integration into modern kitchen cabinetry, it provides a space-saving, professional-grade solution for diverse culinary needs. With four distinct cooking functions including baking, grilling, and roasting, this unit is engineered for both efficiency and reliability in high-volume or home kitchen environments.
