

7.5m Asphalt Paver

This asphalt paver has a maximum paving width of 7.5 meters. The paver utilizes a hydraulic crawler drive and a mechanically extended creed system.

Overview

High-Performance Asphalt Paving

This medium-sized asphalt paver is engineered for versatility and reliability in road construction projects. Featuring a hydraulic crawler drive system and a mechanically extendable screed capable of reaching 7.5 meters, it ensures precise and uniform asphalt application. Independent conveyor and auger systems provide consistent material flow, while high-quality hydraulic components support long-term operational durability.

Engine Specifications

Engine Model	6BTAA5.9-C125
Engine Type	Six-cylinder, direct injection, turbocharged, water cooled
Rated Power	133 kW
Peak Torque	750 N·m @ 1500 rpm
Rated Speed	2000 rpm
Total Displacement	5.9 L
Compression Ratio	16.8:1
Fuel Consumption	206 g/kw·h

Screed System

Paving Width Range	2.5 - 7.5 m
