

75mm Stick Feeder with 3 Input Channels

This 75mm stick feeder is designed for pick and place machines. It features three input channels, allowing simultaneous feeding of multiple component sticks for efficient SMT assembly.

Overview

High-Efficiency Stick Feeder

This 75mm stick feeder is engineered to optimize SMT assembly processes by providing reliable and accurate component delivery. Featuring three distinct input channels, it allows for the simultaneous feeding of multiple component sticks, significantly enhancing production throughput. Its robust construction is designed for high-speed operation, ensuring minimal downtime and consistent pick-up performance for automated pick-and-place systems.

Technical Specifications

Feeder Width	75 mm
Input Channels	3

Compatibility & Support

Supported Feeder Types

Pneumatic • Electric

Compatible Tape Widths	8mm, 12mm, 16mm, 24mm, 32mm, 44mm, 56mm, 72mm, 88mm
------------------------	---
