Product Overview

APPLICATIONS:

Professional lighting solution for residential and commercial outdoor spaces.

Professional Area Lighting

The Shoebox LED area light is engineered for high-performance outdoor illumination in confined spaces such as carparks, driveways, and small sports arenas like tennis or bocce courts. By combining traditional form factors with modern, energy-efficient LED technology, it provides precise illumination while minimizing unwanted light spillage. This durable solution prioritizes security and safety, delivering operational excellence across both commercial and residential applications.

Technical Specifications

Lumen Output

9750 Lm
Total Lumens

130 lm/W
Efficacy

Electrical Characteristics

Parameter	Specification
Input Voltage	AC100-277V
Frequency	50 / 60Hz
Power Factor	> 0.9

Optical Data

- Color Temperature: 2700-6500K
- Color Rendering Index (Indicator): > 70
- Beam Angle: Type IV

Rated Power

75 W

Durability and Design

Shoe Box/Area Light

- The Shoebox is the perfect option for confined area lighting where security and safety is paramount. They take the traditional Carpark/Court light and add the efficiency of LED technology while maintaining form, fit and function.
- Delivering operational excellence it's a product with distinction providing illumination in line with need whilst preventing unwanted light spillage to surrounding areas. Designed specifically for its application its truly fit for purpose.
- Whether it's a private carpark, driveway or small arena sports area such as tennis or bocce, the Shoebox provides illumination for a myriad of opportunities.

Optimized form factor for precise light control and application efficiency.

IP Rating

IP65

Ideal Applications

Carpark, Driveway, Tennis Court, Bocce Arena, Security Lighting
