

7815 Taper Roller Bearing 75x135x44.5 mm

The 7815 taper roller bearing is designed for heavy-duty applications requiring reliable performance and durability. Its tapered rollers and raceways are precisely engineered to ensure optimal load distribution and smooth operation.

Product Overview

High-Performance Taper Roller Bearing

The 7815 taper roller bearing is engineered for heavy-duty industrial and automotive applications requiring high load capacity and durability. Its precision-designed tapered rollers and raceways ensure optimal load distribution and reduced friction during operation. This bearing is ideal for demanding environments such as gearboxes and transmissions where reliable support and smooth performance are essential.

Technical Dimensions

Key Dimensions

75 mm

Inner Diameter

135 mm

Outer Diameter

44.5 mm

Width

Performance & Design

Engineering Features

- Precision-engineered for optimal load distribution
- Reduced friction design
- Heavy-duty construction
- High-precision tapered rollers

Load Handling

Radial and axial loads

Applications

Common Applications

- Industrial machinery
- Gearboxes
- Transmissions
- Automotive components
- Heavy-duty equipment

Quality & Standards

Quality Assurance

100% Quality Inspection • Precision Engineered

Certifications & Compliance

ISO, CE, CNAS
