

7HP 5.5KW Belt-Driven Screw Air Compressor

This 7HP 5.5KW belt-driven screw air compressor provides a reliable and efficient compressed air source. The compressor features a robust construction for durability and long service life.

Overview

Industrial Belt-Driven Screw Compressor

This 7HP 5.5KW belt-driven screw air compressor is engineered for industrial applications requiring a reliable and consistent compressed air source. Built with high-quality technology, it features a robust construction and a compact design for easy integration into existing manufacturing systems. The belt-drive mechanism ensures smooth, quiet operation while delivering efficient air flow for workshops and production plants.

Technical Performance

Core Performance

5.5 kW

Power Output

7 HP

Horsepower

Model	JF-7A
Drive System	Belt-Driven
Technology	Screw Compressor

Quality & Compliance

Compliance Status

Certified Quality • Global Standards

Certifications	ISO 9001, CE, ISO 14001:2004, ISO 9001:2000
Quality Assurance	In-House QA/QC

Manufacturing Services

Available Services

- OEM Service Offered
- Design Service Offered
- Buyer Label Offered

Production Infrastructure

- Above 10 Production Lines
- Dedicated R&D Department
- Integrated Machine Structure Manufacturing
