

8 1/2" Matrix PDC Drill Bit

This 8 1/2" matrix PDC drill bit is designed for drilling in the oil and gas industry. It features PDC cutters for efficient cutting action and a matrix body for enhanced durability and erosion resistance.

Overview

High-Performance Matrix PDC Drill Bit

This 8 1/2-inch matrix body PDC drill bit is engineered for demanding drilling operations in hard formations. Featuring 8 blades and 13mm cutters, it delivers exceptional durability and erosion resistance. It is specifically optimized for efficient penetration in challenging geological layers, including silt, limestone, siliceous sandstone, and calcareous shale.

Technical Specifications

Bit Size	8.5 inch
Number of Blades	8
Cutter Size	13 mm
Body Material	Matrix

Applications

Suitable Formations	Silt, Limestone, Siliceous Sandstone, Calcareous Shale
