

8 5/8" STC Stainless Steel Water Well Screen

This 8 5/8" STC stainless steel water well screen is designed for water well casing applications. Constructed from durable stainless steel, it ensures longevity and resistance to corrosion in harsh subsurface environments.

Product Overview

Professional Water Well Filtration Solution

These 8 5/8 inch stainless steel water well screens are precision-engineered for demanding subsurface environments. Featuring a robust Short Thread Connection (STC) design, they ensure secure, leak-proof installation and long-term structural integrity. Constructed from high-grade stainless steel, these screens provide superior corrosion resistance while effectively managing water flow and preventing sand and gravel ingress, making them an ideal choice for reliable well construction.

Technical Specifications

Connection Type	STC (Short Thread Connection)
Nominal Size	8.625 inch
Material	Stainless Steel

Key Features

Performance Highlights

8.625 inch
Diameter

1 High
Corrosion Resistance

Benefits

- Prevents sand and gravel ingress
- Protects pump systems
- Ensures optimal water flow
- Secure and easy installation
