Overview

Comprehensive Driving Safety Solution

This advanced 8-in-1 vehicle safety system integrates multiple critical driving aids into a single, cohesive unit. Designed to enhance driver awareness and passenger safety, it combines video surveillance, environmental monitoring, and collision prevention technologies. By consolidating driving records, air quality tracking, tire pressure monitoring, and parking assistance, this system provides a complete safety ecosystem for modern vehicles.

Core Features

Integrated Safety Features

Driving Video Recorder (DVR), Parking Assist System, Parking Monitor, Blind Spot Detection, Baby Seat Alarm System, Air Quality Monitor, Tire Pressure Monitoring System (TPMS), Forward Collision Warning (FCW)

Monitoring & Alerts

Environmental & Safety Metrics

2.5 $\mu\text{g}/\text{m}^3$
PM2.5 Monitoring

2.5 ppm
TVOC Levels

Additional Safety Alerts

- Seat Belt Reminder
- Parking Alarm System
- Forward Collision Warning

Technical Specifications

System Capabilities

Feature Category	Functionality
Surveillance	DVR, Parking Monitor
Collision Prevention	Forward Collision Warning, Blind Spot Detection
Vehicle Health	Tire Pressure Monitoring (TPMS), Air Quality (PM2.5/TVOC)

Camera Configuration

Front and rear camera support
