

8-Inch Diamond Core Drill for Concrete and Masonry

This diamond core drill is designed for wet drilling applications in concrete, brick, and block. It features a 2400W motor and a water cooling system.

Overview

Professional Diamond Core Drill

This high-performance 8-inch diamond core drill is engineered for demanding wet drilling applications in concrete, brick, and masonry. Equipped with a powerful 2400W motor, it supports continuous, high-intensity operation for professional construction projects. The integrated water cooling system ensures efficient dust reduction and extended bit longevity, while the ergonomic design provides stability and safety for the operator.

Performance Metrics

Motor Power

2400 W

Power Input

Max Drilling Diameter

8 in

Key Features

Operational Capabilities

- Wet drilling application
- High-intensity continuous operation
- Large water output cooling system
- Suitable for concrete, brick, and block

Safety & Control

Mechanical Clutch, Water Seal Structure, Ergonomic Design
