

8-Inch Flanged Ball Valve

This 8-inch ball valve is designed for industrial applications in oil fields, chemical plants, and environmental protection systems. Its flanged ends ensure secure and leak-proof connections for reliable shutoff and flow control.

Product Overview

Industrial 8-Inch Flanged Ball Valve

This 8-inch ball valve is engineered for demanding industrial applications that require reliable flow control and shutoff capabilities. Constructed from WCB cast steel, it offers robust durability and performance under various operating pressures. The standard flanged end connections ensure a secure, leak-proof integration into existing piping systems, meeting API standards for industrial use.

Technical Specifications

Nominal Size	8 inch
Pressure Rating	150lb / Class 150
Body Material	WCB (Cast Steel)
Connection Type	Flanged
Compliance Standards	API
