

8-Inch High Leverage Combination Pliers

These high leverage combination pliers are made from Cr-V steel for strength. They are designed for gripping, cutting, and bending various materials.

Overview

Professional Performance Pliers

These 8-inch high leverage combination pliers are precision-engineered for demanding gripping, cutting, and bending tasks. Crafted from high-quality chrome vanadium steel, the tool offers exceptional durability and strength for professional-grade applications. The inclusion of ergonomic dual-color TPR handles ensures a comfortable grip, effectively minimizing hand fatigue during extended use.
