

8-Inch Pruning Shear with High Carbon Steel Blade

This professional-grade pruning shear is designed for precise and efficient cutting of branches and stems. It features durable steel blades for long-lasting performance and ergonomic handles for enhanced control.

Product Overview

Professional Pruning Performance

This 8-inch pruning shear is engineered for professional gardening, landscaping, and horticultural applications. Featuring a high carbon steel blade, it delivers precise, efficient cuts on branches up to 20mm in diameter. The ergonomic design, complete with rubberized grips and a spring-loaded mechanism, minimizes hand fatigue during extended use, ensuring smooth and reliable operation.

Technical Specifications

Blade Material	High Carbon Steel
Handle Material	Plastic with Rubber Grips
Cutting Capacity	20 mm
Overall Length	8 inches
Weight	250 g

Features

Key Features	Corrosion-resistant, Spring-loaded, Ergonomic Design, Professional Grade
--------------	--

Application

Recommended Uses

- Gardening
- Landscaping
- Horticultural maintenance
