

8-Inch Steel Blade Pruning Shear

This pruning shear is designed for efficient and precise cutting of branches and stems. Its durable steel blades ensure long-lasting performance.

Overview

Professional Pruning Performance

This 8-inch pruning shear is engineered for efficient and precise cutting of branches and stems. Designed with durability in mind, the steel blades ensure long-lasting performance for rigorous gardening and landscaping tasks. The ergonomic handle design minimizes hand fatigue, allowing for comfortable, extended use in professional or personal settings.

Physical Attributes

Blade Material	Steel
Total Length	8 inches

Key Features

Design Benefits

- Ergonomic handle for comfort
- Reduced hand fatigue
- Precision cutting capability
- Durable construction

Ideal Applications	Gardening, Landscaping, General Pruning
