Product Overview

Professional Vacuum Handling Solution

This 8-inch economy pump suction cup is engineered for the secure lifting and transport of smooth, non-porous materials like glass, metal, and stone. Featuring a reliable pump-activated vacuum system and a red-line safety indicator, it ensures operator awareness of vacuum levels during use. Built for durability and ease of use, it includes a quick-release valve lever and comes protected in a convenient BMC carrying box.

Technical Specifications

Maximum Lifting Capacity

100 kg
Max Load

Suction Cup Diameter	200 mm
Safety Indicators	Red-line vacuum loss indicator, Quick-release valve lever, Includes protection cover

Material & Construction

Material Composition	High-quality, non-toxic, eco-friendly plastic
Packaging	BMC (Blow Molded Case) Box

Usage Guidelines

Compatible Surfaces

- Glass
- Metal
- Smooth stone
- Non-porous flat surfaces

Operating Cautions

High elevation environments may affect suction performance and longevity.
