

8 m3 Concrete Mixer Truck

This concrete mixer truck has an 8 m3 mixing drum capacity. It utilizes integrated modularization design for optimal system performance.

ADDITIONAL IMAGES

Overview

The G08K provides excellent maneuverability and high-performance mixing for urban construction sites.

High-Efficiency Concrete Mixing Solution

The G08K concrete mixer truck features an optimized integrated modular design for superior mixing performance. Equipped with advanced double-log spiral technology, it ensures uniform concrete consistency and prevents segregation during transport. With a robust 8 cubic meter capacity and a reliable hydraulic system, it is engineered for consistent quality and durability on small to medium-sized construction sites.

Technical Specifications

Mixing Drum Capacity

8 m3

Capacity

Weight Parameters

Metric	Value	Unit
Curb weight	14000	kg
Maximum total weight	25000	kg

Outline Dimensions 8935 x 2500 x 3890 mm

Chassis Details

Chassis Model	ZZ1257N3641W
Driving Configuration	6x4
Steering Position	Left Hand Drive

Key Features

Optimized drum design ensures uniform discharge and minimizes material waste.

Hydraulic System Compatibility

- ZF
- Rexroth
- Bonfiglioli
- PMP
- TOP

Advanced Technologies

Double log spiral technology, Continuous trace mixing, Variable lift angle, Integrated modular design
