Product Overview

High-Strength 8-Strand Braided Rope

This 8-strand braided rope is constructed from durable synthetic fibers, engineered for applications that require reliable tensile strength and resistance to abrasion. Its tightly woven design ensures enhanced durability and reduced elongation under load, making it a dependable choice for marine, industrial, and general-purpose tasks. The rope is also resistant to rot, mildew, and chemicals, providing a long-lasting solution for securing, pulling, and lifting.

Technical Specifications

Performance Metrics

100 Grade
Polymer Rating

Construction	8-Strand Braided
Material Properties	Abrasion Resistant, UV Protected, Rot Resistant, Mildew Resistant, Chemical Resistant

Applications

Suitable Applications

- Marine
- Construction
- Industrial
- General-purpose tying
- Securing
- Pulling
- Lifting
