

8-Ton Hydraulic Bottle Jack

This heavy-duty hydraulic bottle jack is designed for lifting in automotive, construction, and industrial settings. It features robust steel construction and precision hydraulics for smooth, reliable lifting of up to 8 tons (16,000 lbs).

Product Overview

Industrial-Grade Hydraulic Bottle Jack

This heavy-duty 8-ton hydraulic bottle jack is engineered for demanding lifting applications across automotive, construction, and industrial sectors. Featuring a robust steel construction, it provides exceptional durability and reliable performance for handling heavy loads. The inclusion of an adjustable screw top extension offers versatile height control, while the wide, rugged base ensures maximum stability and safety during operation.

Technical Specifications

Lifting Capacity

8 ton

Lifting Capacity

16000 lbs

Maximum Load

Construction Material

Heavy-duty Steel, Heat-treated Extension Screw

Features

Key Design Highlights

- Precision-engineered hydraulic system
- Adjustable screw top extension
- Wide, rugged base for stability
- Heat-treated components for safety

Applications

Recommended Use

Automotive • Construction • Industrial Machinery • Heavy Load Lifting
