

8 x 1/2 x 1 1/4 inch GC60 Grinding Wheel

This grinding wheel has an 8-inch diameter, 1/2-inch thickness, and 1 1/4-inch arbor hole. It is constructed with GC60 abrasive grit.

Product Overview

Precision Grinding Performance

This 8-inch diameter grinding wheel is engineered for precision applications, featuring a 1/2-inch thickness and a 1 1/4-inch arbor hole for broad machine compatibility. Constructed with high-quality GC60 green silicon carbide abrasive, it is specifically designed for grinding materials with high hardness and brittleness, such as glass and hard alloys. This durable wheel provides excellent material removal rates and a fine surface finish, making it an ideal choice for sharpening, deburring, and general industrial tool and die work.

Technical Specifications

| | |
|--------------------|-----------------------|
| Diameter | 8 inch |
| Thickness | 0.5 inch |
| Arbor Hole | 1.25 inch |
| Grit Specification | GC60 |
| Abrasive Material | Green Silicon Carbide |

Application Suitability

Primary Applications

- Sharpening
- Deburring
- General Industrial Grinding
- Tool and Die Making

| | |
|-----------------------|---|
| Recommended Materials | Glass, Hard Alloy, High Hardness Metals |
