

# 80-100W Solar Street Light

This solar street light combines a high-efficiency solar panel with a bright LED lighting system. With a power range of 80-100W, it provides ample illumination for roads, pathways, and public areas.

## ADDITIONAL IMAGES

## Product Overview

### Sustainable Outdoor Illumination

This 80-100W solar street light provides a high-efficiency, sustainable lighting solution designed for demanding outdoor environments. Utilizing an integrated photovoltaic module, the system converts sunlight into stored energy, ensuring reliable dusk-to-dawn operation for pathways, parking lots, and public areas. Its durable, weather-resistant construction combined with intelligent light control optimizes energy usage while minimizing maintenance requirements.

## Technical Specifications

Power Output	100 W
Operation	Dusk-to-dawn, Intelligent light control

## Performance Metrics

### System Efficiency

**100 W**

Max Power

**80 W**

Min Power

## Features

### Core Advantages

- High-efficiency photovoltaic solar panels
- Integrated long-lasting battery storage
- Weather-resistant durable construction
- Automatic brightness adjustment
- Low maintenance requirements
