

# 800 DPI USB and PS/2 Mouse

This mouse is compatible with IBM PC Pentium 233 or higher and supports Windows 95/NT, 98, ME, 2000, and XP. It supports both PS/2 and USB and features 800 DPI resolution.

## Product Overview

### Precision Input Control

This 800 DPI mouse offers reliable and precise navigation for standard computing tasks. Designed with versatility in mind, it features dual-interface support, allowing it to connect via both USB and PS/2 ports. It is an ideal solution for legacy systems and standard PC setups requiring consistent, smooth cursor movement.
