

80000KN Heavy-Duty Hydraulic Press

This 80000KN hydraulic press is a heavy-duty machine tool designed for high-force pressing operations. It features a robust frame supported by multiple columns, ensuring stability during operation.

Overview

Industrial-Grade Hydraulic Press

This 80,000KN heavy-duty hydraulic press is engineered for high-force industrial forming, shaping, and assembly operations. Imported to meet rigorous precision requirements, the machine features a multi-column reinforced frame that provides exceptional stability during heavy-duty tasks. It is equipped with advanced hydraulic cylinders to ensure precise force control, making it an ideal asset for large-scale metal component manufacturing.

Technical Metrics

Pressing Force

80000 KN

Total Pressing Force

Core Features

- Robust multi-column frame design
- High-precision hydraulic cylinder control
- Industrial-grade component assembly capabilities
- Stable operation for heavy-duty metal forming

Certifications

Machine Status

Heavy-Duty, Imported, Industrial Grade
