Product Overview

High-Performance 8000W Gasoline Generator

This heavy-duty gasoline generator is designed for reliable power during storm seasons, construction projects, and outdoor usage. Featuring a peak output of 8000W and a 420cc 4-stroke engine, it provides robust performance for demanding applications. The unit is equipped with electric start for hassle-free operation and integrated wheels for easy portability across rugged worksites.

Power Performance

Peak Power

8000 W
Peak Output

Running Power

6500 W
Running Output

Engine Specifications

Safety Systems

- Low-oil level automatic shutdown
- Circuit breaker protection
- Covered outlets for environmental protection

Engine Displacement	420 cc
Engine Type	4-Stroke Gas Engine

Operational Details

Runtime at 50% Load	8.6 hours
Starting Method	Electric start with included battery
Usage Monitoring	Integrated hour meter

Physical Design

Portability Features

- Heavy-duty wheels
- Never-flat tire design
- Durable steel frame

Fuel Tank Features	Large-capacity steel tank with incorporated fuel gauge
--------------------	--

Compliance & Certification

Regulatory Compliance	CE, RoHS, CARB Certified, EMC, EU-V
-----------------------	-------------------------------------

Electrical Configuration

Available Outlets

- Multiple 120V outlets
- 120V/240V selector outlets
