Product Overview

Reliable CDMA Connectivity

This 800MHz CDMA Fixed Wireless Terminal provides a robust and stable communication solution for fixed locations, serving as an effective alternative to traditional landlines. Designed for versatility, it supports RUIM cards and features a single port for seamless integration with standard telephones or communication devices. It is an ideal choice for rural connectivity, temporary setups, or as a reliable backup communication system.

Technical Specifications

Frequency Band	800MHz
Network Technology	CDMA
