

80.9kW Wheel Tractor

This 80.9kW wheel tractor is equipped with a YTO/YUCHAI engine and a LUK 12in double-acting clutch. It also features a 150L fuel tank for extended operation.

ADDITIONAL IMAGES

Overview

The tractor is designed for optimal traction and stability in demanding field conditions.

High-Performance Agricultural Tractor

This robust wheel tractor is engineered for demanding agricultural tasks, offering a balance of power and economic efficiency. Equipped with a reliable, water-cooled diesel engine and a 150L fuel tank, it is built for long operational hours in the field. The machine features a versatile 3-point linkage system and dual-stage clutch, making it compatible with a wide range of implements for plowing, tilling, and harvesting.

Engine & Performance

Rated Power

80.9 kW
