

80kW Low Noise Diesel Generator

This 80kW diesel generator provides a reliable and efficient power solution suitable for various applications. Featuring a robust enclosure designed for sound attenuation, this generator is ideal for noise-sensitive environments.

Overview

High-Performance Power Solution

This 80kW low noise diesel generator is engineered for reliable and efficient power generation in both prime and standby applications. Designed with a robust sound-attenuating canopy, it minimizes operational noise, making it an ideal choice for noise-sensitive environments. The unit integrates a high-quality diesel engine with a precision cooling and fuel system to ensure stable, long-term performance.

Technical Specifications

Rated Power Output

80 kW

Rated Power

Engine Series Compatibility

- 1000 Series
- 1100 Series
- B Series
- D Series

Power Range Coverage

28 - 202 kW

Compliance & Standards

Emission Compliance

Stage 3A • Stage 3B • Tier 4 • National IV • National V

International Certifications

CE, TUV, EPA, ISO 9001:2015

Features

Core Advantages

- Low noise operation
- Compact structure
- Low fuel consumption
- Electronically controlled high-pressure common rail technology
- Sound-attenuating canopy
