Overview

Commercial Upright Glass Door Freezer

This 80L upright glass door freezer is designed for professional display and efficient preservation of frozen goods in supermarkets, convenience stores, and restaurants. Featuring a dynamic cooling system and a thick foam layer for superior insulation, it maintains a stable temperature range of -18°C to -25°C. With its slim design, double-layer hollow glass door for anti-condensation, and adjustable shelving, this unit offers both aesthetic appeal and flexible storage solutions for high-traffic retail environments.
