Overview

Reliable Power Delivery

This high-performance power supply unit is engineered for stable and efficient energy delivery to a wide range of desktop computer configurations. Featuring 80PLUS Bronze certification, it ensures optimal energy efficiency during operation. The unit is designed with a durable construction and an integrated cooling fan to maintain thermal stability under various load conditions.

Performance

Available Wattage

- 400W
- 500W
- 600W
- 700W
- 800W

Efficiency Rating

80PLUS Bronze

Connectivity

Included Connectors

24-pin Motherboard, CPU, PCI-E, SATA, IDE

Design & Cooling

Cooling System

Integrated cooling fan for optimal thermal management
