

## 80x80x25mm AC Cooling Fan

This AC cooling fan measures 80x80x25mm and is designed for cooling electronic equipment. It operates at 220-240V AC and 50/60Hz with impedance protection.

### Product Overview

#### High-Efficiency Cooling Solution

This 80x80x25mm AC cooling fan is engineered for reliable thermal management in demanding electronic environments. Designed for standard 220-240V AC power inputs, it ensures consistent airflow and stable performance. With integrated impedance protection, the unit provides enhanced durability and safety for long-term operational use.

### Technical Specifications

#### Rated Current

**0.07 A**

Current Draw

Physical Dimensions	80 x 80 x 25 mm
Rated Voltage	220-240V AC
Operating Frequency	50/60Hz

### Features

#### Model Number

FD8025-220

Safety Protections	Impedance Protected
